

Pyrobel-Pyrobelite | Pyrobel

Brand Pyrobel-Pyrobelite

Laminated fire-resistant glasses

In case of fire, Pyrobel-Pyrobelite laminated fire-resistant glasses comprising clear Planibel glasses and transparent interlayers transform into opaque screens that keep out flames and reduce or arrest heat transmission.

The product choice depends on:

- the level of fire resistance under national regulations
- the type of application
- the type-approvals for frames and sizes in each country

Pyrobel - Description

Pyrobel fire resistant laminated glass

Function: Integrity (no flames) and Heat Insulation (no heat radiation)

Duration: 15, 30, 45, 60, 90 or 120 minutes
